

Kunle Odunsi, MD, PhD, is the Director of the University of Chicago Comprehensive Cancer Center (UCCCC), Dean for Oncology in the Biological Sciences Division, and the Abbvie Foundation Distinguished Service Professor of Obstetrics and Gynecology at the University of Chicago. His research in tumor immunology and immunotherapy focuses on mechanisms of immune recognition in human ovarian cancer and the pre-clinical and clinical development of tumor antigen-targeted therapies. Currently he is Co-Principal Investigator on the Roswell Park – University of Chicago Specialized Program of Research Excellence (SPORE) in Ovarian Cancer.

As the Director of UCCCC, Dr. Odunsi oversees all programmatic aspects of cancer at the University of Chicago including the three primary missions of research, patient care, and education. He sets the strategic direction of UCCCC, which emphasizes basic, translational, and clinical research efforts; collaborative cancer discovery and care; outreach to and engagement of the catchment area; and expansion of development opportunities for early career and promising cancer researchers. Dr. Odunsi also continues to treat patients and mentor physicians in the clinic.
